Revised: August 2019

Portable Oxygen Policy

Passengers may travel with respirators and properly secured portable oxygen supplies ¹.

- Passengers traveling with portable oxygen concentrators are **not** required to secure the concentrator in any particular place in the vehicle.
- Passengers traveling with portable compressed oxygen cylinders must have the cylinder properly secured in the upright position.
- ACTS recommends traveling with double the amount of oxygen that you believe you may need for your initial trip, appointment, and return trip.
- Passengers using portable oxygen supplies are not required to sit in any particular seat on the vehicle unless they also utilize a mobility device, which must be secured in the vehicle's designated securement area. Oxygen supplies must not obstruct the aisleway of the bus ².

¹ *In accordance with the DOT hazardous materials guidance for safe transportation of medical oxygen for personal use on buses.*

² *In accordance with 49 CFR Part 37.167(h)*
